Cloud Optimization Report

Generated: July 3, 2026

Executive Summary

Current Monthly Spend	\$11,387.20
Potential Monthly Savings	\$3,073.62
Savings Percentage	27.0%
Annual Savings Opportunity	\$36,883.44
ROI	283.7%
FinOps Health Score	35/100 (Critical)
Resources Analyzed	43
Recommendations Generated	26

Savings Opportunities

Savings by Service:	
S3 (7 recommendations)	\$28,542.48/year
RDS (4 recommendations)	\$3,591.60/year
EC2 (9 recommendations)	\$3,600.24/year
EBS (6 recommendations)	\$1,149.12/year
By Category:	
STRATEGIC	11 recommendation(s)
HIGH IMPACT	1 recommendation(s)
QUICK WIN	14 recommendation(s)

Top Recommendations

- S3-GL-006: Migrate data-lake-raw to Glacier**
Risk: LOW | Confidence: 97% | Annual Savings: \$9,914.40
- S3-DA-003: Move backup-archive to Deep Archive**
Risk: LOW | Confidence: 99% | Annual Savings: \$9,331.20
- S3-GL-001: Migrate analytics-data to Glacier**
Risk: LOW | Confidence: 97% | Annual Savings: \$3,427.20
- S3-DA-007: Move cold-reports to Deep Archive**
Risk: LOW | Confidence: 99% | Annual Savings: \$2,688.00
- RDS-RS-001: Rightsize prod-db (db.r5.xlarge !' db.r5.large)**
Risk: MEDIUM | Confidence: 80% | Annual Savings: \$2,102.40
- S3-GL-005: Migrate compliance-docs to Glacier**
Risk: LOW | Confidence: 97% | Annual Savings: \$1,388.04
- S3-IT-004: Enable Intelligent Tiering for ml-training**
Risk: LOW | Confidence: 90% | Annual Savings: \$1,239.24
- EC2-RS-003: Rightsize prod-web (t3.xlarge !' t3.large)**
Risk: LOW | Confidence: 95% | Annual Savings: \$728.76
- EC2-RI-007: Purchase Savings Plan for prod-etl**
Risk: LOW | Confidence: 98% | Annual Savings: \$612.00
- RDS-RS-002: Rightsize staging-db (db.t3.large !' db.t3.medium)**
Risk: MEDIUM | Confidence: 80% | Annual Savings: \$595.68

Cost Forecast (Meta Prophet)

Forecast Model	Prophet
Next Month Projection	\$22,016.09
Growth Rate	7.4%
Confidence Range	\$22,011.71 - \$22,020.93
Seasonality Detected	Yes

Cloud spending is projected to reach \$22,016 next month, reflecting moderate growth of 7.4%. The three-month forecast averages \$21,280/month (range: \$22,012–\$22,021). Seasonal patterns have been detected in historical spending, suggesting cyclical cost variations that should be factored into budgeting. The overall trend is upward, indicating growing infrastructure needs. Consider proactive optimization to manage cost trajectory.

FinOps Health Score

35 / 100 (Critical)

Compute Efficiency	90/100
Storage Efficiency	65/100
Reserved Capacity	80/100

Improvement Actions:

- Terminate or rightsize 2 idle EC2 instance(s) to improve efficiency.
- Delete 4 orphaned EBS volume(s) to reduce storage waste.
- Add lifecycle policies to 4 S3 bucket(s) with inactive data.
- Purchase Savings Plans for 9 long-running instance(s).
- Enable Intelligent Tiering on 2 bucket(s) with cooling access patterns.

Implementation Roadmap

Week 1	Quick Wins — Delete orphaned volumes, enable Intelligent Tiering
Week 2	High Impact — Rightsize underutilized EC2 and RDS instances
Month 2	Strategic — Purchase Savings Plans for long-running workloads
Month 3	Lifecycle — Migrate cold S3 data to Glacier / Deep Archive
Ongoing	Monitor — Track FinOps score and optimize continuously
